Prius Gen 3 Inverter Logic Board Dual Motor

Brand: EVBMW
Product Code: Pri_G3_V1d
Availability: 3
Weight: 0.00kg
Dimensions: 0.00cm x 0.00cm x 0.00cm

Price: 325.00€

Ex Tax: 325.00€

Short Description

V1d Logic board PCB for the Toyota Prius Gen3 inverter with most SMD parts placed.
Runs BOTH the MG1 and MG2 power stages for running two motors independently such as in a Toyota Hybrid transaxle
Can also run the MG1 power stage for optional AC battery charging via the boost converter.
Price includes worldwide tracked postage.
Connectors NOT supplied apart from 50 way JST.
Please see attached connector BOM for part details.
Supplied fully programmed with two WiFi modules AND 50 Way JST connector.
Also includes AMPSEAL breakout board.

Please see the relevant support thread on the OpenInverter forum linked below for details
Fully open source project.
Support via the openinverter.org [Forum](#)
Software and resources available on [Github](#)
Software for charging is now available:
https://github.com/celeron55/prius3charger_buck

Delivery : up to 4 weeks from order.
No tax or other surcharges.
